## **COMMON-CARRIER EQUIVALENCY POLICY**

### **BLOOM LAKE RAILWAY PROJECT**

The Bloom Lake Railway upon inception will operate as a private provincially regulated railway. Upon future development and/or public necessity requirements, the Bloom Lake Railway will meet provincial and/or federally regulated railways statutory duties and obligations when conducting its business of accommodating traffic. Furthermore, Bloom Lake Railway will afford and make available adequate and suitable facilities for traffic. If called upon in the future, the Bloom Lake Railway will issue commercially reasonable rates and tariffs in respect of the movement of traffic at the request of the shipper, and will meet statutory “level of service” obligations to shippers as outlined in the Canada Transportation Act (CTA), where applicable and/or necessary, all of which to be negotiated.
