

Churchill River, Ice Thickness Measurements – Apr. 23, 2018

Map of Churchill River with locations, marked as yellow diamonds, of boreholes (BH) that were drilled into the ice. Snow depth and ice thickness from the boreholes are given in the table below

Borehole ID	Longitude	Latitude	Snow depth [cm]	Ice thickness [cm]
BH1	-60.582551	53.260801	25	71
BH2 *	-60.412184	53.271778	28	~81

* Sand and gravel present at bottom of borehole
